Thank-you for investigating our new website. We are very proud of the way it turned out.

Answers for December Newsletter Trivia:

Q1: Gordon Stephens, founder of Ironwood Plastics, spent 27 years working at what company in Detroit?

Answer: Gordon worked for Master Spline Tool and Gage company in Livonia, Michigan for 27 years, the last 15 as superintendent. Master Spline produced precision master gearing for many military and industrial customers. At one point, Gordon, Mark and Grandpa Stephens (Vince) all worked at the same company. It has been out of business for many years.

Q2: How many seats of design equipment does Ironwood Plastics have?

Answer: 14, including 6 seats of Pro E, 7 seats of Cadkey and one seat of I-deas. We also have one seat of Mold Flow- Mold Advisor.

Q3: What is the current temperature in Ironwood, Michigan?

Answer: Just click on the link at the left of this page to get that one. It's probably colder and snowier than where you are. Ironwood is located 15 miles from Lake Superior and about 800 feet higher elevation than the lake. Because of that, our temperatures are warmer than areas south of us, but we get a ton of lake effect snow- averaging 250 inches per year.

Q4: What is the combined facility square footage of the 3 facilities (Ironwood, Ironwood Tech Center and Two Rivers)?

Answer: 85,410 square feet combined. 54,210 for the main plant; 6,000 at the Tech Center next door and another 25,200 in Two Rivers.
